

Amendments to the Specification:

Page 9, replace the paragraph beginning on line 20 with the following amended paragraph:

--There will now be described, with reference to figure 3, an embodiment of an antenna 30 in the form of a flexible circuit. This antenna 30 lines the inside surface of a main face of a cap with electrodes 31 and the inside surfaces of the side faces of the cap with electrodes 32, 33, 34. These electrodes are all connected to a board via linking tracks 40, shown on Figure 6 ~~(not shown)~~.--
